To whom it may concern:

Walton County has embarked on a two-year Active panel refresh for all classrooms within our district. We researched several panels and decided on the Cleartouch 4K 75" panel to replace our legacy active boards.

In the first Phase, we installed 250 ClearTouch 75" 6000 series panels during the summer. In the second Phase, we will install 260 panels during the upcoming summer that will complete the upgrade of every classroom within the district.

During the first phase, I started late in the year and thought I might not be able to complete the installation but ClearTouch expedited the entire process from shipping to installation which resulted in all panels installed and teachers trained before school opened.

Our teachers and administrators are pleased with the new panels and how they enhance the learning experience in the classroom.

I highly recommend this product for any teaching environment that wants to increase student engagement and learning opportunities.

Sincerely,

Henry C Martin
