"WORKING TO IMPROVE OUR DISTRICT"

To Whom It May Concern:

It with great pleasure that I recommend Clear Touch Interactive. While serving as Principal of Clarksdale High School, I was fortunate to visit the Clear Touch booth while attending the International Science and Technology Conference about 2 years ago. During that time, Clarksdale High School was in the market to upgrade technology in all our classrooms. After evaluating several brands, the team decided on Clear Touch Interactive. Our goal was to invest in a brand that could be a complete turnkey solution involving sales and support. It was clear that they were superior to their competitors with similar technology.

Soon after the conference, Clarksdale High School began purchasing the Clear Touch Boards. Teachers, parents and students alike were thrilled about the functionality, durability and individual learning opportunities afforded with this device. As a result, our district is in the planning stages of purchasing over 200+ panels from Clear Touch.

To date, we are very satisfied with solution, service, and support. Our teachers and students have begun to collaborate with the panel unlike any touch technology we have ever seen. I highly recommend this company to your district as a trusted partner in interactive technology.

Educationally Yours,

Manika Kemp
