To: Cleartouch Interactive

From: Mark Wilson

As the IT Director for Madison County Schools and as a former Sales Rep selling AV Products in the K12 arena, I have had a lot of experience with Interactive Panels. I take great pride in evaluating and making sure our school system gets the best and most cost efficient products we can.

Our system choose to go with Cleartouch Interactive because of the quality of the Panel, the experience in dealing with the high quality support team that stands behind the product. and of course the quality of the Snowflake software that greatly enhances instruction, and sets it apart from other panels. We are working on equipping every classroom in the district; and in less than 3 months have purchased over 100 panels, and hope to grow next year to equip another 300-400 rooms.

I have no problem in recommending this product and the staff at Cleartouch, for helping our teachers and students to the next level of Technology integration in the classroom.

Thanks

Mark Wilson
